## DROPOUTS AND POORLY PREPARED STUDENTS HAVE A NEGATIVE IMPACT ON THE ECONOMY

More than 9,400 students did not graduate from Kansas' high schools in 2009; the lost lifetime earnings in Kansas for that class of dropouts alone total more than **\$2.4 billion**.<sup>1</sup>

Kansas would save more than **\$125.8 million** in health care costs over the lifetimes of each class of dropouts had they earned their diplomas.<sup>2</sup>

If Kansas' high schools graduated all of their students ready for college, the state would save almost **\$42.8 million** a year in community college remediation costs and lost earnings.<sup>3</sup>

Kansas' economy would see a combination of crime-related savings and additional revenue of about **\$62.7 million** each year if the male high school graduation rate increased by just 5%.<sup>4</sup>

## THE HIGH SCHOOL CRISIS IS CONCENTRATED IN THE NATION'S DROPOUT FACTORIES

Dropout factories are high schools in which the number of seniors is routinely 60% or fewer than the number of freshmen three years earlier. These dropout factories generally have high proportions of minority and/or low-income students.
